### Abstract

**PURPOSE:** To improve the reliability of a user interface by displaying a selected literature name even on a screen where the retrieved words are inputted and therefore confirming the literature name at an earlier stage.

**CONSTITUTION:** A retrieving system selection processing part 105 informs a selected retrieving system to a retrieved word input processing part 106. The part 106 displays a retrieved word input picture and also requests a literature name display processing part 109 to show the literature name. Thus the literature name is displayed by the function of the part 109. The fact that the input of the retrieved word is detected, when the part 106 informs a retrieval processing part 108 of the retrieved word. The part 108 carries out the retrieval processing based on the informed retrieved word and informs a text display processing part 107 of the corresponding contents. The part 107 displays the informed contents on an LCD via an LCD control part 102.
